Mohammed Farhaan Ahmed

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Data Scientist position at your London-based AI software company. With a Master's in Data Analysis for Business Intelligence from the University of Leicester and over three years of hands-on experience at BMW Group—including placements in Germany and the United States—I am eager to apply my expertise in LLMs, machine learning, and AWS to build conversational analytics platforms for financial market data.

In my current role as a Data Scientist at BMW Financial Services, I have developed end-to-end AI solutions directly relevant to your needs. I built a fully functioning LLM that summarizes customer feedback, assigns sentiment, and categorizes comments into predefined KPI topics—a core capability for conversational analytics. I also created an automated testing tool that saved 70% of release time into AWS warehouses, and developed a traditional AI model for predicting customer renewability. My experience with AWS services—including Athena, Sagemaker, Bedrock, and Textract—aligns perfectly with your AWS-based platform requirements.

Previously, as a Graduate Data Scientist at BMW Group, I developed an AI detection model that compared paper contracts against system values, reducing manual comparison time from 15 minutes per contract to seconds. I also automated monthly performance reports for HQ, saving 10 hours per month, and built an elasticity model to optimize car pricing. My technical toolkit includes Python, SQL (Athena, Oracle, PostgreSQL), FAISS vector databases, RAG systems, and statistical modeling—all essential for your experimentation pipelines and domain-specific financial models.

I am particularly excited about the opportunity to work within a small, highly technical team developing AI systems for the London Stock Exchange ecosystem. My background in building production-grade LLMs and machine learning models, combined with my experience in financial services analytics, positions me to contribute immediately to your conversational analytics products.

I would welcome the chance to discuss how my skills can drive your next stage of

product development. Thank you for your consideration.

Sincerely,
Mohammed Farhaan Ahmed
