Mohammed Farhaan Ahmed

farhaanzaki@gmail.com | 07424743260

Ambitious Data Scientist with 3+ years of experience building ML and LLM-driven systems on AWS for financial services. Proven track record in developing conversational analytics tools, fine-tuning LLMs, and applying statistical modeling to customer data. Expertise in Python, NLP, and AWS (Athena, Sagemaker, Bedrock) with a strong focus on delivering production-grade AI solutions for financial datasets.

Experience

Data Scientist – BMW Financial Services 04/2024 – present

- Developed an automated testing tool using AWS services, reducing product release time by 70% for the data warehouse.
- Built an end-to-end ML model to predict customer renewability in financial services, applying feature engineering and model evaluation.
- Created a data masking tool with AWS and open-source services to obfuscate sensitive customer data before AI processing.
- Developed a fully functional LLM that summarizes customer feedback, assigns sentiment, and categorizes into predefined KPI topics, enabling conversational analytics.

Graduate Data Scientist – BMW Group US/UK/AG 2022 – 2024

- Designed an AI detection model to compare paper contracts against system values, reducing manual comparison time from 15 minutes to seconds.
- Automated monthly performance reports for HQ, saving 10 hours per month and enabling real-time data-driven decisions.
- Developed an end-to-end business product for customer renewability analysis, integrating statistical modeling and quantitative analysis.
- Built an elasticity model for optimal car pricing, applying optimization techniques to maximize revenue.
- Planned and conducted a three-day workshop on retail strategy for employees across Europe, demonstrating leadership and cross-functional collaboration.

Python Developer – INI Labs inc 2021 – 2022

- Built HTML webpages from complex PDF, DOC, and TXT files using REGEX and Python, enabling document parsing for downstream analytics.
- Developed RESTful APIs using Flask to serve webpages, supporting integration with data pipelines.
- Collaborated with team members on code optimization and reviews, ensuring high-quality software delivery.

Education

MSc. in Data Analysis for Business Intelligence, University of Leicester (2019 – 2020)

Skills

Python, Pandas, NumPy, Scikit-learn, Machine Learning, Statistical Modeling, Deep Learning, LLMs, NLP, Fine-tuning, Prompt Engineering, RAG systems, Agentic Workflows, AWS: Athena, EC2, S3, SageMaker, Comprehend, Bedrock, Textract, SQL: Athena, Oracle, PostgreSQL, GitHub, Tableau, Java, JavaScript, C, Kotlin
