Mohammed Farhaan Ahmed

farhaanzaki@gmail.com | 07424743260

Data Scientist with 3+ years of experience building ML models and LLM-driven systems on AWS. Proven track record in developing conversational analytics tools, including a fully functional LLM for summarization and sentiment analysis. Strong background in statistical modeling, feature engineering, and deploying AI solutions for financial services. Eager to apply expertise to conversational analytics and financial data products.

Experience

Data Scientist – BMW Financial Services 04/2024 – present

- Developed an LLM that summarizes customer feedback, assigns sentiment, and categorizes comments into predefined KPI topics, enabling conversational analytics on customer data.
- Built an end-to-end traditional AI model to predict customer renewability, applying statistical modeling and feature engineering to financial services datasets.
- Created an automated testing tool using AWS (Athena, S3) that reduced release time for new products by 70%, improving experimentation pipeline efficiency.
- Designed a data masking tool with AWS and open-source services to obfuscate sensitive customer data, ensuring compliance for AI model processing.

Graduate Data Scientist – BMW Group US/UK/AG 2022 – 2024

- Developed an AI detection model comparing paper contracts against system values, reducing manual comparison time from 15 minutes per contract to seconds for hundreds of contracts.
- Automated monthly performance reports for HQ, saving 10 hours per month through efficient data pipelines.
- Built an end-to-end business product to analyze customer renewability rates, leveraging quantitative analysis and ML models.
- Developed an elasticity model for optimal car pricing, applying statistical optimization techniques.
- Planned and conducted a three-day workshop on retail strategy for employees across Europe, demonstrating leadership and communication skills.

Python Developer – INI Labs inc 2021 – 2022

- Built HTML webpages from complex PDF, DOC, and TXT files using Python, REGEX, and tags, enabling document parsing and data extraction.
- Developed RESTful APIs using Flask to link webpages, supporting integration with data systems.

- Collaborated with team members on code optimization and reviews, ensuring high-quality software delivery.

Education

MSc. in Data Analysis for Business Intelligence, University of Leicester (2019 – 2020)

Skills

Python, Machine Learning, NLP, LLMs, AWS (Athena, EC2, S3, SageMaker, Comprehend, Bedrock, Textract), Statistical Modeling, Feature Engineering, SQL (Athena, Oracle, PostgreSQL), FAISS Vector DB, RAG Systems, Agentic Workflows, Deep Learning, Pandas, NumPy, Scikit-learn, Tableau, GitHub
