Ambitious Data Scientist with 3+ years of experience building ML models and LLM-driven systems for financial services at BMW. Expertise in Python, AWS, and conversational analytics, with a proven track record of developing AI products that automate data analysis and improve decision-making. Eager to apply LLMs and advanced analytics to financial market data.

Experience

Data Scientist – BMW Financial Services 04/2024 – present

- Developed an end-to-end traditional AI model for predicting customer renewability in Financial Services, applying statistical modelling and feature engineering to financial datasets.
- Built a fully functioning LLM that summarizes customer feedback, assigns sentiment, and categorizes into predefined KPI topics, enabling conversational analytics on unstructured data.
- Created an automated testing tool using AWS (Athena, S3) that reduced release time by 70% for new financial products in the data warehouse.
- Designed a masking tool with AWS and open-source services to obfuscate sensitive customer data before AI model processing, ensuring compliance in financial environments.

Graduate Data Scientist – BMW Group US/UK/AG 2022 – 2024

- Developed an AI detection model comparing paper contracts against system values, automating a manual 15-minute process to seconds, improving efficiency for financial document analysis.
- Built an elasticity model to optimize car pricing using quantitative analysis, maximizing revenue through data-driven pricing strategies.
- Automated monthly performance reports sent to HQ, saving 10 hours per month and enabling real-time data-driven decisions.
- Developed an end-to-end business product for understanding customer renewability rates, integrating ML models into AWS-based platforms.

Python Developer – INI Labs inc 2021 – 2022

- Built RESTful APIs using Flask to serve complex PDF, DOC, and TXT files as HTML webpages, applying regex and NLP techniques for text extraction.
- Collaborated with engineering teams on code optimization and reviews, ensuring high-quality model integration.

Education

MSc. in Data Analysis for Business Intelligence, University of Leicester (2019 – 2020)

Skills

Python, Machine Learning, LLMs, NLP, Statistical Analysis, Feature Engineering, Model Evaluation, AWS: Athena, S3, Sagemaker, Bedrock, Comprehend, Textract, SQL: Athena, Oracle, PostgreSQL, GitHub, Pandas, NumPy, Scikit-learn, Tableau
