Mohammed Farhaan Ahmed

farhaanzaki@gmail.com | 07424743260

Results-driven AI Engineer with 3+ years of experience delivering production-grade LLM solutions and AI systems in financial services. Proven track record of building end-to-end AI products from 0 to 1, including LLM-based summarization, sentiment analysis, and classification. Strong software engineering background with Python, AWS, and MLOps. Eager to drive AI strategy and lead the deployment of LLMs in wealth management.

Experience

Data Scientist – BMW Financial Services 04/2024 – present

- Developed a fully functioning LLM that summarizes customer feedback, assigns sentiment, and categorizes into predefined KPI topics, deployed in production.
- Built an end-to-end AI model for predicting customer renewability, directly impacting retention strategy.
- Created a masking tool using AWS and open-source services to obfuscate sensitive customer data before AI processing, ensuring compliance.
- Developed an automated testing tool that reduced release time for new products into AWS warehouse by 70%.

Graduate Data Scientist – BMW Group US/UK/AG 2022 – 2024

- Designed and deployed an AI detection model comparing paper contracts against system values, reducing manual comparison time from 15 minutes per contract to seconds.
- Automated monthly performance reports for HQ, saving 10 hours per month.
- Developed an end-to-end business product for understanding customer renewability rate, enabling data-driven decisions.
- Built an elasticity model for optimal car pricing, maximizing revenue.
- Planned and conducted a three-day workshop on retail strategy for employees across Europe.

Python Developer – INI Labs inc 2021 – 2022

- Built HTML webpages from complex PDF, DOC, and TXT files using REGEX and Python, served as RESTful APIs via Flask.
- Collaborated with team members on code optimization and code reviews, ensuring high-quality software delivery.

Education

MSc. in Data Analysis for Business Intelligence, University of Leicester (2019 – 2020)

Skills

LLMs, RAG systems, Agentic Workflows, FAISS Vector DB, Machine Learning, Deep Learning, Statistical Analysis, Python, Pandas, Numpy, Scikit-learn, AWS: Athena, EC2, S3, Sagemaker, Comprehend, Bedrock, Textract, SQL: Athena, Oracle, PostgreSQL, GitHub, Tableau, Java, JavaScript, C, Kotlin
