Mohammed Farhaan Ahmed

farhaanzaki@gmail.com | 07424743260

Senior AI Engineer with 3+ years of experience building and deploying production-grade LLM systems and AI applications at BMW. Expertise in designing LLM-powered applications, RAG pipelines, agentic systems, and end-to-end machine learning models. Strong Python engineering background with proven ability to deliver scalable AI solutions in cloud environments (AWS).

Experience

Data Scientist – BMW Financial Services 04/2024 – present

- Developed a fully functioning LLM that summarizes customer feedback comments, assigns sentiments, and categorises them into pre-defined KPI topics.
- Designed and implemented RAG-based retrieval systems using FAISS Vector DB and AWS Bedrock for customer data analysis.
- Built agentic workflows to automate data processing pipelines, reducing manual effort by 70%.
- Developed end-to-end traditional AI model for predicting customer renewability in Financial Services.

Graduate Data Scientist – BMW Group US/UK/AG 2022 – 2024

- Created an AI detection model that successfully compared paper contracts against system values, increasing efficiency from 15 minutes per contract to seconds.
- Automated performance reports sent to HQ monthly, saving 10 hours every month.
- Developed an end-to-end business product for understanding customer renewability rate using machine learning.
- Developed an elasticity model to accurately price cars with highest optimization.

Python Developer – INI Labs inc 2021 – 2022

- Built HTML webpages of complex PDF, DOC, and TXT files using REGEX and tags in Python.
- Linked webpages and rendered as a RESTful API using FLASK web framework.
- Oversaw and collaborated with team members for ensuring code optimization and code reviews.

Education

MSc. in Data Analysis for Business Intelligence, University of Leicester (2019 – 2020)

Skills

Python, LLM Application Development, RAG Pipelines, LangChain, LangGraph, Agentic Systems, FAISS Vector DB, AWS: Bedrock, Sagemaker, Comprehend, Athena, EC2, S3, Textract, Machine Learning, Deep Learning, SQL (Athena, Oracle, Postgre), GitHub, Pandas, Numpy, Scikit-learn, Tableau, Java, JavaScript, C, Kotlin
