Mohammed Farhaan Ahmed

Dear Hiring Manager,

I am writing to express my strong interest in the Senior Data Scientist position at your London-based AI software company. With over three years of hanu7iyghuikhguikgds-on experience building AI and machine learning systems at BMW Group—across placements in Germany and the United States—I am eager to apply my expertise in LLMs, conversational analytics, and AWS to your next stage of product development.

In my current role as a Data Scientist at BMW Financial Services, I developed an end-to-end LLM that summarizes customer feedback, assigns sentiment, and categorizes comments into predefined KPI topics—directly relevant to your conversational analytics platform. I also built a traditional AI model for predicting customer renewability and created an automated testing tool that reduced release time by 70% into an AWS warehouse. My experience extends to developing a masking tool using AWS and open-source services to obfuscate sensitive data before AI processing, demonstrating my ability to build secure, production-ready systems.

Previously, as a Graduate Data Scientist at BMW Group US/UK/AG, I created an AI detection model comparing paper contracts against system values, saving 15 minutes per manual comparison and processing hundreds of contracts in seconds. I also automated monthly performance reports for HQ, saving 10 hours each month, and developed an elasticity model for optimal car pricing. My technical stack includes Python, SQL (Athena, Oracle, PostgreSQL), AWS (Sagemaker, Bedrock, Comprehend, Textract), and advanced ML/NLP techniques including RAG systems and agentic workflows.

I am particularly excited about the opportunity to build domain-specific models for financial data within the London Stock Exchange ecosystem. My MSc in Data Analysis for Business Intelligence from the University of Leicester, combined with my proven ability to deliver end-to-end AI solutions in fast-paced environments, makes me a strong fit for this role.

I would welcome the chance to discuss how my experience can contribute to your

team. Thank you for your consideration.

Sincerely,
Mohammed Farhaan Ahmed
