Mohammed Farhaan Ahmed

farhaanzaki@gmail.com | 07424743260

Senior AI Engineer with 3+ years of experience building production-grade LLM systems and AI applications. Proven track record in developing RAG pipelines, agentic workflows, and end-to-end machine learning solutions at BMW. Strong Python engineering background with expertise in LLM architectures, retrieval systems, and cloud deployment. Eager to design and deploy next-generation AI products in a fast-paced environment.

Experience

Data Scientist – BMW Financial Services 04/2024 – present

- Developed a fully functioning LLM application that summarizes customer feedback, assigns sentiment, and categorizes into predefined KPI topics, deployed in production
- Designed and implemented RAG pipelines using FAISS vector database and AWS Bedrock for retrieving relevant context to enhance LLM responses
- Built agentic workflows for automated data masking using AWS services, ensuring compliance and data privacy in AI pipelines
- Developed end-to-end traditional AI model for predicting customer renewability, from data ingestion to deployment

Graduate Data Scientist – BMW Group US/UK/AG 2022 – 2024

- Created an AI detection model comparing paper contracts against system values, reducing manual comparison time from 15 minutes per contract to seconds
- Automated monthly performance reports sent to HQ, saving 10 hours per month using Python and SQL
- Developed an end-to-end business product for understanding customer renewability rate, including data pipeline and ML model
- Built an elasticity model for optimal car pricing using statistical analysis and machine learning

Python Developer – INI Labs inc 2021 – 2022

- Built RESTful APIs using Flask framework to serve HTML webpages generated from complex PDF, DOC, and TXT files using Python and regex
- Collaborated with team members on code optimization and code reviews, ensuring high-quality software engineering practices

Education

MSc. in Data Analysis for Business Intelligence, University of Leicester (2019 – 2020)

Skills

Python (Pandas, NumPy, Scikit-learn, Flask), LLM Application Development (LangChain, LangGraph, RAG, Agentic Systems), AWS (Bedrock, Sagemaker, Comprehend, Textract, Athena, EC2, S3), Vector Databases (FAISS), SQL (Athena, Oracle, PostgreSQL), Machine Learning & Deep Learning, Statistical Analysis, GitHub, Tableau, Java, JS, C, Kotlin
