Mohammed Farhaan Ahmed

farhaanzaki@gmail.com | 07424743260

Data Engineer with 2.5+ years of experience in designing, building, and testing data engineering solutions, including data migration and integration into cloud ecosystems. Proficient in Python, SQL, AWS (Athena, S3, EC2, Sagemaker), and ETL processes. Skilled in automating data pipelines, developing testing frameworks, and ensuring data quality. Strong background in data modeling, cleaning, and pre-processing. Experienced in Agile environments and cross-functional collaboration. Eager to contribute to data migration projects and improve data architecture.

Experience

Data Analyst – BMW Financial Services April 2024 – current

- Designed and developed an automated testing tool for data validation during product releases into AWS warehouse, reducing testing time by 70%
- Built end-to-end data pipelines for traditional AI models, including data extraction, cleaning, and transformation using AWS services
- Implemented a data masking tool using AWS and open-source services to obfuscate personal and sensitive data, ensuring compliance with data privacy regulations

Global Leadership Development Programme (Data Engineering Rotations) – BMW

- Extracted and collected data from Athena database in AWS, performing data cleaning and pre-processing using SQL and Python for machine learning models Oct 2022 – April 2024
- Developed an elasticity model for car pricing optimization, involving data integration and statistical analysis
- Automated monthly performance reports by building data pipelines to ingest data into a warehouse and created customer dashboards in Tableau
- Created an AI detection model to compare paper contracts against system values, automating data comparison and reducing manual effort from 15 minutes per contract to seconds

Data Curator/Scientist and Python Developer – INI Labs Inc. Sept 2019 - Dec 2020

- Built HTML webpages from complex PDF, DOC, and TXT files using Python and REGEX, transforming unstructured data into structured formats
- Performed data cleaning and pre-processing on unstructured files scraped from the internet, ensuring data quality for downstream applications
- Developed RESTful APIs using Flask to serve converted data, enabling prototype debugging and integration with production environments

- Collaborated with team members on code optimization and code reviews, ensuring adherence to coding standards

Education

MSc. Data Analysis for Business Intelligence, University of Leicester (2022)

Bachelor of Engineering (Computer Science), Jawaharlal Nehru Technological University, Hyderabad India (2019)

Skills

Python, SQL, AWS Athena, AWS S3, AWS EC2, AWS Sagemaker, AWS Comprehend, ETL, Data Migration, Data Integration, Data Warehousing, Data Modeling, Data Quality, Testing, Tableau, Pandas, NumPy, Scikit-learn, Flask, Django, Git, PostgreSQL, Oracle, HTML/CSS, JavaScript
